

How to locate your service tag number to enter in a work order

If you look at your desktop- the very first line says **Host Name.**

That is your service tag number.

Please enter this on your work orders, even if there is no window field requesting it.

They need this number to help resolve most issues that have to do with fixing your computer, including when software doesn't work or is missing.

Host Name:	HC11VH1
OS Version:	Windows XP
Machine Domain:	GPISD
User Name:	shthornton
Logon Domain:	GPISD
IP Address:	0.0.0.0
